

GALA SPECIALTY PELLETIZING

Customer Focused

Gala Specialty Pelletizing is designed to provide our customers with efficient and expedient solutions to process challenges through state-of-the-art equipment and Gala's commitment to excellent service.

We are able to provide larger lab scale testing, as well as large market samples, or contract pelletizing services. Pellet sizes range from 4 mm down to 0.5 mm, depending on product and formulation.

Gala can provide process assistance with equipment configuration, die plate sizing and design, screw design, and melt pump efficiency studies.

Our Equipment

- State-of-the-art 53mm twin screw extruder with multiple vents and vacuum
- Gravimetric Feeders
- Gear Pump
- Continuous Screen Changer
- Gala Model 7 Pelletizer and Centrifugal Dryer
- Classifier
- Bulk unloading and loading capabilities

GALA SPECIALTY PELLETIZING

Our Corporate Philosophy

Competent, Respectful and Accountable

Gala remains focused on our customer's requirements for continued growth. Our product range and services are specifically designed to deliver the results that our customers require. We are naturally driven to provide the highest level of support and accountability to our customers.

We know our business; we combine international thinking with local market knowledge to bring innovative designs to our customers. Gala has built a seamless global support structure providing our customers with confidence in our commitment to their business success.

Reliability and respect for values are the foundation for our approach to our customers. Innovation and the skill of our work force ensure the ongoing optimization of our systems and that the development of new products and services are in line with market demand.

We look forward to serving you!
